

*Providing Innovative Solutions For The Magnetic Recording Industry*

#### **ISI ANNOUNCES RELEASE OF A NEW SOFTWARE PLATFORM CALLED 'V7'**

SANTA CLARA, CA – July 30, 2013: Integral Solutions International, ISI, the world's leading manufacturer of Quasi-Static testers for the data storage industry, announced today the release of a new software platform called 'V7'.

Key features of this V7 software platform are:

- Typical 7.5% and up to 15% faster test times compared to the current V5 software version, for significantly increased UPH

- Win7-32bit and WinXP compatibility

- .NET compatibility for customer project developments

- This will be the development platform for all future major ISI software developments

- Improved setup file format (not compatible with existing V5 setup files, but compatible with existing V6 setup files)

- Software will run in EDIT mode (no hardware connection) without license.

- User can start evaluation license without ISI approval. Only trial extensions will require unlock code from ISI.

- Tests developed in VB6 will continue to work with minor modifications (instructions are available online).

The upgrade charge for this new software license will be \$2500/tester, and will be licensed on a per tester basis. Further, all new or upgraded 'PLUS' systems shipped/upgraded after Jan 1, 2013 will be entitled to this new software license at no charge. In addition to a license to the current V7 software version, this license will allow free V7 software upgrades at no charge for a period of one year thereafter.

A 30-day trial license for this V7 software is also available. Feel free to contact ISI regarding the evaluation license or purchase of an official license.

Due to the extensive rework of this new software, including major UPH improvements, ISI recommends that careful evaluation of this new software be performed before this is released for production-line or other critical-usage environments.

#### **About ISI**

Integral Solutions International (referred to as ISI) is a privately held California based US Corporation. ISI was established in September 1995 and is the leading manufacturer of Quasi-Static testers for GMR, TMR and Perpendicular Heads. This includes a line of Quasi-Static (QST) Testers, ESD and Temperature Stress Testers. ISI's product line of testers consists of Row Bar QST, Slider QST, HGA, HSA, HDA, and Tape Head QST. Optional components include the ESD MR Head Stress System and Temperature Controller System.

ISI provides worldwide customer support from the United States, Japan, Korea, Singapore, Malaysia, Thailand, China, Hong-Kong, and the Philippines.
