Integral Solutions International (ISI) Appoints Industry Veteran to Join Advisory Leadership

San Jose, CA, June 30, 2021---- Integral Solutions International (ISI) the leading manufacturer of MRAM and Magnetic Sensor testers, today announced the appointment of Kenneth J. Huening, a seasoned semiconductor veteran, to its Advisory Board.

Ken joins ISI's Advisory Board bringing over 35 years of semiconductor industry experience. Ken was part of the first 50 people to create the Analog Industry giant Maxim Integrated Products and helped grow the company from \$0 to 2.5B. He managed over 15 groups including Wafer Scale Packaging, Quality, Shipping, Customer Service and two business groups Automotive and Military. Having left Maxim he also helped Aquantia and Nextinput achieve next level performance and they were both later acquired by Marvell and Quorvo respectively.

Henry Patland commented, "Ken's overview of the whole semiconductor ecosystem from Front End Fabrication to Back End Test including Reliability qualification will help ISI set its strategic direction for deploying our innovative magnetic test solutions to help the advancement of magnetic product solutions into the commercial market".

Ken commented, "ISI's proprietary technologies evolved from Magnetic Digital Storage Product Test and has continually advanced to keep up with new demands in rapidly growing markets of Magnetic Memories and Sensors. Their advanced test capabilities not only benefit the Research and Development phases but low-cost production test phases of these new magnetic products. They are the recognized leading provider of these specialized Magnetic Materials Test Systems."

About ISI:

ISI provides a range of magnetic test solutions for the MRAM, semiconductor, data storage, and magnetic sensor industries. ISI is the leader in Magnetic Test solutions because of the flexible and unique capabilities contained in their technologies deployed in their test systems. ISI holds over 20 patents and has shipped more than 1000 test systems worldwide. Customers recognize the advantages in test speed, reliability, diagnostic and characterization capabilities contained as standard features in each system delivered.
